DETAILED ACTION

Allowable Subject Matter

Claims 1-10 are allowed in view of the prior art.

The following is an examiner's statement of reasons for allowance:

As to claim 1, the prior art of record, taken either alone or in combination, fails to disclose or render obvious a speckle interferometer apparatus that measures an interference speckle pattern formed by interference of a rough object surface, the apparatus comprising, *inter alia*, an optical member mounting that mounts a luminous flux dividing device and luminous flux outputting devices and keeps them separate from an imaging device, where a predetermined area of the mount is a light-transmitting area that transmits the interference light reflected from the light surface to the imaging device, in combination with the rest of the limitations of the above claim.

In particular, see the applicants' arguments dated March 29, 2006 in response to the previous office action. While speckle interferometry is well known, the claimed arrangement of the elements of the device is neither anticipated nor made obvious by the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael A. Lyons whose telephone number is 571-272-2420.

The examiner can normally be reached on Monday through Friday.
